Sir:

This is in response to the Office Action mailed on February 13, 1997. Please amend the above-identified application as follows:

IN THE CLAIMS

Please rewrite the following claims as indicated:

1. (Twice amended) A nasal dilator for preventing outer wall tissue of nasal passages of a nose drawing in during breathing, comprising:  
a flexible unitary truss member having [a normally, substantially planar] an initial state absent flexure thereof, the unitary truss member including:  
a first end region adapted to engage the outer wall tissue of a first nasal passage;  
a second end region adapted to engage the outer wall tissue of as second nasal passage;  
an intermediate segment configured to traverse a portion of a nose located between the first and second nasal passages, the inherent tendency of the truss member to return to its [normally planar] initial state
